Whatsapp Messenger: 00963937532212 | **Address:** Damascus, Syria, Damascus, Syria (Home)

● EDUCATION AND TRAINING

2017/09/01 – 2023/09/01 Damascus, Syria

INFORMATION TECHNOLOGY ENGINEERING Damascus University

Core AI & Data: Neural Networks, Machine Learning, Data Mining, Intelligent Search Algorithms

Software Engineering: Data Structures, Algorithms, Object-Oriented Programming, Software Architecture, Database Systems, Operating Systems, Computer Networks

Development: Web & Mobile Application Development, API Design, System Integration

Field of study Artificial Intelligence

● WORK EXPERIENCE

PRODUCT OWNER – REDEEMLY.COM – 2025/04/04 – Current – RIYADH(REMOTE), SAUDI ARABIA

Business or Sector: Information and communication | **Department:** IT | **Email:** m.deeb@redeemly.com |

Website: redeemly.com

- Leading the product vision and roadmap for a **B2B/B2C** SaaS platform focused on digital rewards and **loyalty solutions**.
- Collaborate with cross-functional teams to define and prioritize features, manage product backlogs, and deliver high-impact user stories using Scrum methodologies.
- Work closely with stakeholders and engineers (ASP.NET Core, Odoo) to ensure smooth delivery of scalable, API-driven services that align with business goals and customer needs.
- Spearheaded the **digital transformation of internal operations**, replacing manual processes with an integrated **Zoho One CRM ecosystem**, enabling process automation, centralized data management, and improved operational scalability.

PROJECT MANAGER – ULTRAWARES – PHARAON GROUP – 2023/09/01 – 2025/03/27 – DAMASCUS, SYRIA

Business or Sector: Information and communication | **Department:** IT | **Website:** ultrawares.com

- Lead the development and implementation of a comprehensive ISP billing system designed to handle millions of users across diverse regions.
- Oversee project lifecycle, including requirements gathering, system design, development, testing, and deployment.
- Manage cross-functional teams across backend (Laravel), frontend (React, Flutter), and third-party integrations (Elasticsearch, FreeRADIUS).
- Ensure seamless integration of modules like billing cycles, subscriptions, payments, user management, and real-time support chat.
- Implement and refine processes for recurring billing, dynamic user segmentation, and database optimization to support scalability.

BACKEND TEAM LEAD – ALFAHAD REGIONAL COMPANY – 2022/01/01 – 2023/09/01 – DAMASCUS, SYRIA

Business or Sector: Accommodation and food service activities | **Department:** IT

- Designed and implemented real-time live conversations integration using Pusher with Laravel-React-Flutter, which increased user interaction by 35%.
- Collaborated with front-end developers and web designers to match visual design intent, leading to a 35% improvement in user experience ratings.

- Set up project requirements by gathering and analyzing necessary information, defining scope, goals, and deliverables, which ensured 100% project completion on time and within budget.
- Led the development of a comprehensive online platform, including both the website and dashboard, resulting in a 40% increase in user acquisition.
- Developed and maintained the project timeline and task schedule using CRM tools and JIRA, tracking milestones, identifying risks, and implementing corrective actions, leading to a 20% reduction in project delays.
- Provided backend support for websites, mobile applications, and dashboards, focusing on identifying and resolving bugs and issues to ensure optimal functionality, resulting in a 55% decrease in reported issues.

SOFTWARE DEVELOPER – SQUARE TECH COMPANY – 2021/11/01 – 2022/12/13 – KUWAIT, KUWAIT

Business or Sector: Information and communication | **Department:** IT

- Provided backend support for an educational website and dashboard, resulting in a 30% increase in user engagement.
- Managed support and maintenance contracts efficiently, utilizing expertise in backend development to enhance the reliability and efficiency of the systems, achieving a 85% customer satisfaction rate.
- Responsibilities included database management, server configuration, and ensuring seamless integration between various components, which improved system performance by 40%.
- Developed and managed Laravel backend systems, integrating third-party services such as Google, Apple, Google Maps, and Firebase, leading to a 30% increase in service reliability.
- Created and maintained RESTful APIs, admin dashboards, and APIs using Laravel to support various functionalities, resulting in a 25% increase in API usage.
- Integrated with external services like KWT SMS APIs for enhanced communication capabilities, which improved communication efficiency by 35%.

● **SKILLS**
